SUBJECT.

Extension and improvements to the Town of Hassan.

13/8/1

Judged.

W D 88—GPB—50,000—21 7.16

Note.

In his Nos 746 & 787 dy 25th April & 18th May/; the President of the Municipalities, Hassan Distt submitted an Estimate for sanction for Rs 3000/- on account of compensation for houses & lands taken up for extending & improving the Hassan Town. As ordered by the 2nd Councillor a detailed account of the improvements & extensions proposed to be carried out was called for in Pro Dr No- 13562/144-95 dy 31-5-99.

Subsequently in his No 819 dy 23rd May/99 the Pdnt requested sanction to the sum of Rs 550/- drawn as advance on account of compensation pr to the Holagers & Madys whose houses were acquired for the improvement of the Town & stated that this sum would be adjusted in due course out of the sum of Rs 3000/- for which Govt sanction has been applied. On this the 2nd Councillor ordered that the President's reply ~~to the~~ Contained the information, called for on his first reference, should be awaited.

In spite of a reminder ~~dt~~ issued on 12-8-99 no reply has been received ~~from the Pdnt~~ to the Pro Dr dy 31-5-99.

The President, however, now in Court's his letter dy 23rd May/99, submits the receipts obtained from parties concerned for the sum of Rs 550/ drawn as advance & requests that sanction may be accorded as the item is appearing as ~~an~~ unadjusted advance in the Comptroller's list.

Above matter may be laid out

To.

The Secretary to the Govt
of Mysore, General & Revenue
Departments.

Sir,

I have the honor to state that in the months of November last, as an urgent plague precautionary measure, I considered it necessary to acquire the houses &c belonging to the Holeyars & Madigars who were living within the municipal limits of Hassan, whose uncleaning habits & mode of living, a source of danger to public health and consequently, to locate them in a part somewhat remote from the town

fresh sites
town. So they were induced to take up
on an unobjectionable locality for
building houses.

2. Being an indepnt class, it was
necessary to pay up compensation
on the spot, at least to a majority
of them, & I therefore drew an advance
of Rs. 550/- for the purpose with a view
to have it adjusted in due course as a
sum of Rs. 3000/- is provided in the
current Municipal Budget of Hassan
under the head "compensation".

Further information called for in this ref^e 28th

3. A separate reference has been
made to Government for sanctioning
the whole of this compensation amount,
but meanwhile, I request you will be good
enough to obtain sanction of Govern-
ment for the sum of Rs. 550/- drawn as
advance & to issue necessary instruc-
tions to the Comptroller in the matter.

I have the honor to be,
Sir,
Your most obedient servant,

Chairman
President of Municipality
Hassan Dist.

Deputy Commissioner's Office
Hafsan District,

Dated. Hafsan 16th December 189
17

From,

The Deputy Commissioner
and President Hafsan

To

The Secretary to the
Government of Mysore.
General and Rev. Departt

Sir,

With reference to your
No 13,562 Dated 31st May 1899, Calling
L.T. 744-95
for a report regarding the improv-
-ments and extensions proposed
to be carried out in the Town of
Hafsan, I have the honor to for-
-ward herewith a sketch showing
the improvements already effected
together with those which are pro-
-posed for adoption

2 —— Soon after I took charge

of

of the District, the first thing that chiefly occupied my attention was the sanitation of the Town of Hafsa which was in a very backward state. Except in a very few houses the daily Conservancy system did not obtain here, not only because there were not many scavengers who were willing to do that sort of work but also the Construction of houses without Conservancy lairs rendered the introduction of such a system impossible without injury to the religious feelings of the inhabitants, who generally are very loathe to admit the scavengers inside their houses. Owing to this, but system which almost entirely existed here. Each year the accumulation of night-soil in the back-yards of the native houses ...

a: "loth" loathe?

so great as to render the Town very insanitary. This was not the case when I visited Hafar. The low situation of the Town and the heavy monsoon followed by cold season renders the whole Town so extremely damp that, a great number of houses on that account are not habitable without serious injury to health. The close nearness of the Town of Hafar to Malwad regions and the circumstance that many houses are situated much lower than the road level aggravate its insanitary Condition. The congested state of the Town which contains many dense crowded and loath-some localities, not open to the blessings of light and air is the greatest

greatest drawn back of the Town.

3 — The mountainy state of this Town appears to my mind to be peculiarly favourable to the appearance and spread of epidamic diseases and to the propagation of the plague Germ, if ever it should unfortunately be introduced into this Town I soon found by enquiries that my fears were not unfounded as small-pox has been almost every year raging in this Town with a virulence which is unknown to many other Towns. The medical officer of the Station who has visited many of the filthiest parts in my Company is also of the same opinion as myself. To the urgent necessity, therefore, of affording some immediate relief, however little it might

out a few over-crowded portions of the Town and formed Conservancy lanes and roads which are indicated in the Sketch by red-ink lines. The urgency of the matter did not enable me to go through the slow process of formally acquiring the lands for that purpose although I was able to obtain the Consent of their owners to the appropriation of their sites subject to the payment of reasonable Compensation for them at some near future date.

4 — The chief measures by means of which I propose to improve the sanitation of this Town are: —

Firstly — By the introduction of the dail conservancy system into private houses.

Leonard

Second ly – By the demolition of such small portions of the Town as are necessary for any improvement

Thirdly – By exchanging such portions for others more convenient

Fourthly – By fresh Building –

5 – It is to be hoped that the Corporation of Bridgetown will avail themselves of the powers granted them by the Act of Parliament, and that the Conservancy Clause in the thickest parts of the Town have been opened with the result that manure and night soil are now easily removable and the inconvenience of the back yards of private houses is rendered less; but near almost every house in the outer streets [illegible]

Owing to the paucity of Scavengers last
year who were willing to remove
night soil daily Conservancy could
not be extended to any appreciable
extent. Further, the views of most
people who were ignorant of the
baneful effects of the pit system had
to be corrected; and when it was
found that they became alive to the
benevolent effects of the daily con-
-servancy. Nine Scavengers from
Sholapur were imported with the
result that, people are gradually
restoring to it.

6 —— Manure being one of the
sources of income to many people
and also being an article of
receipts for agriculturists, its collec-
-tion in private backyards was
so large that, the adoption of
early

early measures to counteract the evil resulting therefrom became necessary & In many cases the same pit which is intended for deposit of night-soil is also used for storing manure and the pits vary in dimensions, some of them being as deep as 8 to 10 feet and as broad as 6 to 8 feet. The minute daily inspection of back-yards during last year and the early part of this year and the pressure brought to bear on the people regarding the removal of their ancient manure led to the agreeable Complaint on their part that the price of manure fell from one Rupee a cart-load to two annas a cart load.

7 ——— Although some progress has already been effected still a great deal remains to be done. The

Kerak

sketch shews that ten conservancy lanes are yet to be opened. The daily conservancy system has to be rendered far more popular and eventually has to be substituted for the pit system. This may require the importation of a few more scavengers which will be done when necessity arises.

8 — Next, I come to the demolition of such portions of the Town as are incapable of any improvement. In the plot of the ground marked "Demolition" in the sketch and surrounded on all the four sides by roads there are twenty houses excluding those situated on the road-sides. This locality, which consists of very irregularly built houses, is in my opinion, and that of the medical officer

J.

of the Station Dr. L. A. Narajappa eminently favorable for the propagation of the plague germs or any other epidemic disease. The soil is saturated with sewage, the rooms are painfully small, absolutely devoid of ventilation and strangers to the rudest system of sanitary conveniences, while the habits and the profession of the people who live there tend to aggravate its filthy condition. The difference of level between one house and another in this locality varies considerably in some cases. A pretty large number of cattle which are owned by the residents of this portion of the Town contribute their share towards its insanitation. It is impossible to improve it in any way excepting by demolishing the

the houses themselves. Its state
is highly injurious not only to the
inhabitants of that locality but
is a source of danger to the whole
Town itself. Hence, I have decided
to acquire all the houses excepting
those situated on the road sides
and pull them down With this view,
the declaration statement published
in the Mysore Gazette on page
284 Dated 13th April 1899, was sub
-mitted by me

9 — As an instance I quoted
this particular locality - while there
are a few other localities which
I propose to deal with similarly in
Course of time. Thus Bastalgiri,
Kumbaralgiri, and Kougar's Quarters
marked in the plan ought, in my
opinion, to be shifted to the South
- western extension, the houses excepting

a

a few situated therein ought to be
pulled down, and fresh sites marked
and given out to the people for con-
-struction of dwelling-houses reserving,
of course, such portions as are
necessary to be preserved for a good sup-
-ply of fresh air and light to the
immediate surroundings of houses
10 — The third measure is the
extension of the Town towards the
east and the North the Town is not
capable of being extended The eastern
-portion of the town being chiefly Composed
of public Offices and Officers' quarters
it is undesirable to allot any sites
for ordinary private houses any
-where close to them. The northern
portion does not admit of extension
owing chiefly to the proposed Con-
-struction of the Railway Station and
to the vicinity of the civil cemetery

which it is desirable to increase in
such. The South is not acceptable to
the people owing to their deep rooted
superstitious beliefs in evil omens
& omens etc. Further, in the South there
are situated very close to the town
many gardens and market and
near which it is undesirable
to locate dwelling-houses. The
West, no doubt, admits of expansion
but in this direction are situated
Holafeii and Madifeii near which
other people cannot be expected
to build their houses. It is there-
fore found indispensable to
shift Holafeii and Madifeii
to some distance from the
Town and then locate the extan-
sions there. People are generally
averse to build houses on the
sites

sites on which Holaféri and Madi
féri now stand, owing to their ad
vantageous position; and when
the trench near this place is filled
up a greater space will be avail
able for purposes of extension. As
the shifting of Holaféri and madi
féri will naturally take some time
I have selected the place marked
in the sketch for immediate exten
sion. It is situated to the South
west of Hafpan and hence called
the South-western extension. It
is bounded on two sides by roads
and is situated close to the Town
and to the Dispensary. The locality
is pretty high and possesses natural
drainage towards the South. Its
objectionable nearness to Hinsin
Kéré Tank, its close proximity to
the extensions which result from
the shifting of Holaféri and
Madiféri

Madiyéri are also its other ad-
vantages. From the Sketch it
can be seen that the sites have
been already marked out and
that roads and Conservancy lanes
have been traced Each site
measures 75 feet by 45 feet and is
considered to be quite ample for
ordinary houses which alone
the people of this place can
afford to construct.—

11. —— The Holéyéri is proposed
to be shifted to the site marked
in the plan. The houses in big
Holéyéri have already been ac-
-quired and sites and roads
have already been marked in
the extension. Soon after the Com-
pletion of the well now under
Construction, the Holéyas will
Construct

Construct their houses and remove to the extension - For Madyori and small Holalûri a few sites have been selected and acquired near the Taluk Cutcherry where they are willing to construct their houses. I have not yet finally settled where they are to be located and before compensation is paid for their houses, that question will be definitely settled.

12 — Lastly, I come to trench filling. From the sketch it can be seen that two trenches as such are in existence now in this town, of them being situated to the South and the other to the West. When I took charge of the District, I found that the filling of the Southern trench was in contemplation But — I found that I could not give

Effect

effect to it owing to the comparatively greater receipts of filling the Western trench and also to the comparatively greater usefulness derivable from it. That the Town is incapable of being extended in the Southern direction has been already shewn in para 10. The Mohemedan houses situated close to the Southern trench do not permit other people to readily take up sites there for building purposes. The old Jail and its Compound just opposite to this trench are obstacles in the way of any further extension in the southern direction. Hence the only good derivable from closing this trench seems to me to render the place less advantageous

to

the deposit of night-soil by people and thus to improve the sanitation. But the advantages flowing from the filling up of the Western trench are very many. This trench is virtually a public privy for Halejars and Madijars chiefly and the Southern breeze has to pass over it before it can reach the inhabitants of the Town. Further, the rampart-wall adjoining this trench by its great height cuts off to some extent the South-western breeze before it enters the Town. By filling it up, therefore, this state of things, is not only remedied but the extension of the Town towards the West, which is the only direction in which the Town

Cant

can be extended, will be rendered practicable as already observed in para 10. Hence I took up this work in hand in preference to the other and three sections of this trench have been filled up and the corresponding rampart walls knocked down. The four roads R1 to R4 (vide the sketch) serve to connect the Town with the Hola-Giri-road and establish convenient thoroughfare between the existing Town and the proposed extensions.

13 — As regards roads a few remarks are necessary A few good roads are badly needed in this Town which consists of a great number of narrow lanes. The site selected for the proposed Railway

Railway Station being situated to the North-east of the Talawa Lakeboy road & connecting the South western extension and the Hapan Periya-pahua Road with the Hapan-Salgué road is proposed with a view to provide a good metalled road for traffic outside the Town. I would, however, strongly advocate the location of the Railway Station at some convenient distance behind the present Holabéri and Madigé for many reasons. The contiguity of the Station to Hunisdhéré will secure a good supply of water to the Railway Company at a small cost. By its comparative nearness to the Town the locality proposed will be more convenient to the public

A desirable stimulus will also be given to the proposed extensions in case the Station is settled to be built there

14 —— Roads 2 and 5 marked in the plan are proposed with the object of doing away with many filthy places in the course and of giving more light and fresh air to the surrounding localities which are badly in want of them. Road 5 connects the Bangalore-Mangalore Road and the Chatram street (situated almost in the heart of the Town) passing over the Southern trench and touching the Bangalore-Mangalore Road near the old Jail. Wherever public convenience is likely to be promoted there new roads have been proposed, the opening of which will, however, be but

put off till more urgent measures are effected.

15 — The measures of sanitation which have still to be carried out require ample funds for their speedy execution Owing to the paucity of funds at the credit of the Municipality it was proposed in my letter No: 855, Dated 31st May 1899, that the yearly debit of Rupees 2000 towards the cost of supplying water to the Town might be put off by the Government till three years hence; and I wished to state in this connection that unless this request of the Municipality is complied with the urgent sanitary measures I have in my view cannot be fully given effect to. Although I do not deny the large amount of convenience that

will certainly flow from the proposed supply of water to this Town, still I am certain in my conviction that it is only next in importance to sanitary measures so far as this Town is concerned, especially when plague has been slowly but steadily spreading in the Province.
